INDEX TO VOL. LXXVI. (A)

Abney (W. de W.) Modified Apparatus for the Measurement of Colour, and its Application to the Determination of the Colour Sensations, 315.
Address delivered by the President, Sir W. Huggins, November 30, 1904, 1.
Air, determination of neon and helium in (Ramsay), 111.
Alexander (A. D.) See Bairstow and Alexander.
Alloys of copper, manganese, aluminium, magnetic qualities (Fleming and Hadfield), 271
Ammonia, direct synthesis of (Perman), 167.
Antarctic observations with horizontal pendulum (Milne), 284.
Atmospheric electricity in high latitudes (Simpson), 160.

Bairstow (L.) and Alexander (A. D.) Explosions of Mixtures of Coal-gas and Air in a Closed Vessel, 340.
Balance, experiment with, to find if temperature affects weight (Poynting and Phillips), 445.
Barnett (S. J.) Note on Dr. H. A. Wilson's Memoir "On the Electric Effect of Rotating a Dielectric in a Magnetic Field," 367.
Beilby (G. T. and H. N.) The Influence of Phase Changes on the Tenacity of Ductile Metals at the Ordinary Temperature and at the Boiling Point of Liquid Air, 462.
Bielid meteors, perturbations of (Downing), 266.
Blake (G. S.) See Dunstan and Blake.
Burke (J. B.) Note on Fluorescence and Absorption, 165.
Burrard (S. G.) On the Intensity and Direction of the Force of Gravity in India, 313.

Calorimeters, studies with liquid hydrogen and air (Dewar), 325.
Chlorine, atomic weight of, determination by burning in hydrogen (Dixon and Edgar), 250.
Claxton (T. F.) Preliminary Report on a Survey of Magnetic Declination near the Royal Alfred Observatory, Mauritius, 507.
Coal-gas and air, explosion in closed vessel (Bairstow and Alexander), 340.
Colour and colour sensations, apparatus for measurement of (Abney), 315.
Colours in metal glasses, metallic films, etc. (Garnett), 370.
Crookes (Sir W.) On the Phosphorescent Spectra of Sδ and Europium, 411 ; —— A New Formation of Diamond, 458.
Cuthbertson (C.) and Prideaux (E. B. R.) On the Refractive Index of Gaseous Fluorine 426.

Darwin (G. H.) The Analogy between Lesage's Theory of Gravitation and the Repulsion of Light, 387.
Davies (J. H.) See Perman and Davies.
Denison (R. B.) and Steele (B. D.) The Accurate Measurement of Ionic Velocities, 556.

Dewar (Sir James) On the Thermo-electric Junction as a Means of Determining the Lowest Temperatures, 316 ; —— Studies with the Liquid Hydrogen and Air Calorimeters, 325 ; —— and Jones (H. O.) The Physical and Chemical Properties of Iron Carbonyl, 558.
Diamond, new formation of (Crookes), 458.
Dixon (H. B.) and Edgar (E. C.) The Atomic Weight of Chlorine : an Attempt to determine the Equivalent of Chlorine by Direct Burning with Hydrogen, 250.
Downing (A. M. W.) The Perturbations of the Bielid Meteors, 266.
Dunstan (W. R.) and Blake (G. S.) Thorianite, a new Mineral from Ceylon, 253.
Dynamics of matter and ether, application of statistical mechanics to (Jeans), 296.

Earthquakes, nature of propagation of (Oldham), 102 ; (Milne), 284.
East Loch Roag, area of magnetic disturbance (Field), 181.
Edgar (E. C.) See Dixon and Edgar.
Electric charges, rate of dissipation of, in open air (Farr), 152.
Electric furnace, new type of (Harker), 235.
Electricity, atmospheric, in high latitudes (Simpson), 160.
Europium and Sδ, phosphorescent spectra of (Crookes), 411.
Explosions of coal-gas and air in closed vessel (Bairstow and Alexander), 340.
Explosions, pressure of (Petavel), 492.
Explosives, researches on (Noble), 381, 512.

Farr (C. C.) On some Continuous Observations of the Rate of Dissipation of Electric Charges in the Open Air, 152.
Field (A. M.) Report on an Area of Local Magnetic Disturbance in East Loch Roag, Lewes, Hebrides, 181.
Fleming (J. A.) and Hadfield (R. A.) On the Magnetic Qualities of some Alloys not containing Iron, 271.
Fluid, viscous, flowing in pipe—distribution of velocity over cross-section and action at critical velocity (Morrow), 205.
Fluorescence and absorption, note on (Burke), 165.
Fluorine, refractive index of (Cuthbertson and Prideaux), 426 ; spectrum of (Lunt), 118.
Fox (Francis) The Boring of the Simplon Tunnel, and the Distribution of Temperature that was encountered, 29.
Functions, gamma and elliptic (Jackson), 127.

Gamma-function and elliptic functions (Jackson), 127.
Garnett (J. C. M.) Colours in Metal Glasses, in Metallic Films, and in Metallic Solutions.—II, 370.
Glaciers, grained structure of (Quincke), 431.
Gravitation, Lesage's theory of (Darwin), 387.
Gravity, intensity and direction of, in India (Burrard), 313.

Hadfield (R. A.) See Fleming and Hadfield.
Hahn (O.) A New Radio-active Element which evolves Thorium Emanation. Preliminary Communication, 115.
Harker (J. A.) On a New Type of Electric Furnace, with a Redetermination of the Melting Point of Platinum, 235.
Hartley (W. N.) The Absorption Spectra and Fluorescence of Mercury Vapour, 428.
Heat, method of finding conductivity for (Niven), 34.

Heats, specific and latent, studied with liquid hydrogen and air calorimeters (Dewar), 325.
Helium in air, determination of (Ramsay), 111.
Hopkinson (B.) and Rogers (F.) The Elastic Properties of Steel at High Temperatures, 419.
Huggins (Sir W.) Presidential address delivered November 30, 1904, 1; —— and Lady Huggins. On the Spectrum of the Spontaneous Luminous Radiation of Radium. Part III.—Radiation in Hydrogen, 488.

Ice, formation of, and structure of glaciers (Quincke), 431.
Ionic velocities, accurate measurement of (Denison and Steele), 556.
Ions, transit in electric arc (Swinton), 553.
Iron carbonyl, physical and chemical properties of (Dewar and Jones), 558.

Jackson (F. H.) The Basic Gamma-Function and the Elliptic Functions, 127.
Jeans (J. H.) On the Application of Statistical Mechanics to the General Dynamics of Matter and Ether, 296; —— On the Laws of Radiation, 545.
Jones (H. O.) See Dewar and Jones.

Larmor (J.) Note on Dr. S. J. Barnett's paper, 369.
Light, repulsion of, analogy with Lesage's theory of gravitation (Darwin), 387; —— theory of reflection near polarising angle (Maclaurin), 49.
Lockyer (Sir N.) Further Researches on the Temperature Classification of Stars. No. 2, 145; —— On the Observations of Stars made in some British Stone Circles.—Preliminary Note, 177; —— and W. J. S. The Flow of the River Thames in Relation to British Pressure and Rainfall Changes, 494.
Lunt (J.) On the Spectrum of Silicon; with a Note on the Spectrum of Fluorine, 118.
Lyons (H. G.) On the Relation between Variations of Atmospheric Pressure in North-East Africa and the Nile Flood, 66.

Maclaurin (R. C.) Theory of the Reflection of Light near the Polarising Angle, 49 —— On Newton's Rings formed by Metallic Reflection, 515.
McLeod (C.) Records of Difference of Temperature between McGill College Observatory and the Top of Mount Royal, Montreal, 415.
Magnetic declination near Royal Alfred Observatory, Mauritius (Claxton), 507.
Magnetic disturbance, area of local, in East Loch Roag, Hebrides (Field), 181.
Magnetic field, electric effect of rotating dielectric in (Barnett), 367; (Larmor), 369.
Magnetic qualities of iron-free alloys (Fleming and Hadfield), 271.
Manley (J. J.) See Veley and Manley.
Mauritius, magnetic declination near Royal Alfred Observatory (Claxton), 507.
Mees (C. E. K.) See Sheppard and Mees.
Mercury vapour, absorption spectrum and fluorescence of (Hartley), 428.
Metal glasses, films, etc., colours in (Garnett), 370.
Metals, influence of phase changes on tenacity of (Beilby), 462.
Meteors, Bielid (Downing), 266.
Micrometer, improved electric (Shaw), 350.
Milne (J.) Preliminary Notes on Observations made with a Horizontal Pendulum in the Antarctic Regions, 284.
Morrow (J.) On the Distribution of Velocity in a Viscous Fluid over the Cross-section of a Pipe, and on the Action at the Critical Velocity, 205.

Neon in air, determination of (Ramsay), 111.
Newton's rings formed by metallic reflection (Maclaurin), 515.
Nile flood, relation to atmospheric pressure in North-East Africa (Lyons), 66.
Niven (C. On a Method of Finding the Conductivity for Heat, 34.
Noble (Sir A.) Researches on Explosives.—Part III, 381 ; Supplementary Note, 512.

Oldham (R. D.) The Rate of Transmission of the Guatemala Earthquake, April 19, 1902, 102.

Peake (A. H.) The Determination of the Specific Heat of Superheated Steam by Throttling and other Experiments, 185.
Pendulum, horizontal, observations with in Antarctic Regions (Milne), 284.
Perman (E. P.) The Direct Synthesis of Ammonia, 167 ; —— and Davies (J. H.) Determination of Vapour-pressure by Air-bubbling, 174.
Petavel (J. E.) The Pressure of Explosions.—Experiments on Solid and Gaseous Explosives, 492.
Phillips (P.) See Poynting and Phillips.
Photographic development, chemical dynamics of (Sheppard and Mees), 217; —— negative, microscopic structure of (Sheppard and Mees), 217.
Pipes, flow of water in, distribution of velocity and action at critical velocity (Morrow), 205.
Platinum, melting-point of (Harker), 235.
Poynting (J. H.) and Phillips (P.) An Experiment with the Balance to find if Change of Temperature has any Effect upon Weight, 445.
Prideaux (E. B. R.) See Cuthbertson and Prideaux.

Quincke (G.) The Formation of Ice and the Grained Structure of Glaciers, 431.

Radiation, laws of (Jeans), 545.
Radio-active element, new (Hahn), 115 ; —— minerals (Strutt), 88, 312.
Radium, spectrum of radiation of, in hydrogen (Huggins), 488.
Ramsay (Sir Wm.) A Determination of the Amounts of Neon and Helium in Atmospheric Air, 111.
Rayleigh (Lord) On the Influence of Collisions, and of the Motion of Molecules in the Line of Sight, upon the Constitution of a Spectrum Line, 440.
Reflection, metallic, and Newton's rings (Maclaurin), 515.
Refractive index of gaseous fluorine (Cuthbertson and Prideaux), 426 ; —— indices of sulphuric acid (Veley and Manley), 469.
Rogers (F.) See Hopkinson and Rogers.

Shaw (P. E.) The Improved Electric Micrometer, 350 ; —— The Amplitude of the Minimum Audible Impulsive Sound, 360.
Sheppard (S. E.) and Mees (C. E. K.) The Theory of Photographic Processes, Part II : On the Chemical Dynamics of Development, including the Microscopy of the Image, 217.
Silicon, spectrum of (Lunt), 118.
Simplon tunnel—distribution of temperature encountered (Fox), 29.
Simpson (G. C.) Atmospheric Electricity in High Latitudes, 160.
Sound, amplitude of minimum audible impulsive (Shaw), 360.
Spectra of europium and Sδ (Crookes), 411.
Spectrum line, influence of collisions, etc., upon constitution of (Rayleigh), 440.

Spectrum of star, evolution of, from nebula (Wilson), 380.
Stars, temperature classification of (Lockyer), 145 ; evolution of spectra (Wilson), 374.
Statistical mechanics applied to dynamics of matter and ether (Jeans), 296.
Steam, specific heat of superheated (Peake), 185.
Steel, elastic properties at high temperatures (Hopkinson and Rogers), 419.
Steele (B. D.) See Denison and Steele.
Stone circles, observations of stars made in (Lockyer), 177.
Strutt (R. J.) On the Radio-active Minerals, 88 ; —— Note Supplementary to a Paper "On the Radio-active Minerals," 312.
Sulphuric acid, refractive indices (Veley and Manley), 469 ; —— electrical conductivity of dilute solutions of (Whetham), 577.
Swinton (A. A. C.) The Transit of Ions in the Electric Arc, 553.

Temperature, difference of, between McGill College and Mount Royal, Montreal (McLeod), 415.
Thames flow in relation to pressure and rainfall changes (Lockyer), 494.
Thermo-electric junction for determining low temperatures (Dewar), 316.
Thermo-junctions, study of, at high temperatures (Harker), 235.
Thorianite, new radio-active element from (Hahn), 115 ; —— new mineral from Ceylon (Dunstan and Blake), 253.

Uranium, connection with radium (Strutt), 88.

Vapour-pressure, determination by air-bubbling (Perman and Davies), 174.
Veley (V. H.) and Manley (J. J.) The Refractive Indices of Sulphuric Acid at Different Concentrations, 469.

Water, flow in pipes (Morrow), 205.
Weight, relation to change of temperature (Poynting and Phillips), 445.
Whetham (W. C. D.) The Electrical Conductivity of Dilute Solutions of Sulphuric Acid, 577.
Wilson (W. E.) The Evolution of the Spectrum of a Star during its Growth from a Nebula, 374.

END OF THE SEVENTY-SIXTH VOLUME (SERIES A).

HARRISON AND SONS, Printers in Ordinary to His Majesty, St. Martin's Lane.
